American Cancer Society[®]

Our mission is simple: Save lives, celebrate lives and lead the fight for a world without cancer

The American Cancer Society is the nationwide, community based, voluntary health organization dedicated to eliminating cancer as a major health problem by preventing cancer, saving lives, and diminishing suffering from cancer, through research, education, advocacy, and service.

Progress in the war against cancer has triggered a 32% decline in U.S. deaths over the past two decades, which equates to 3.5 million fewer cancer deaths. But we can't stop there. Over 1.9 million new cancer cases are expected to be diagnosed in 2023 and more than 609,360 Americans will lose their battle this year – that equates to nearly 1,700 deaths per day. The American Cancer Society is committed to changing these devastating odds by remaining the most impactful cancer-fighting organization and investing in health equity initiatives.

WE APPLY NEW DISCOVERIES THAT MAKE A DIFFERENCE ACROSS ALL CANCERS – AND REACH MILLIONS IN NEED.
